Product Overview

Professional Surface-Mounted Electrical Solution

This surface-mounted wall switch and socket series is specifically engineered for European electrical systems. Constructed from high-quality, impact-resistant materials, these components provide reliable power distribution and lighting control for both residential and commercial environments. The surface-mount design ensures straightforward installation, offering a durable and safe solution that meets rigorous performance requirements.

Technical Specifications

Mounting Type	Surface-mounted
Series	8005
Material Characteristics	Impact-resistant, Durable, High-quality construction

Application Suitability

Suitable Environments

- Residential
- Commercial

Application

Lighting Control • Power Distribution
