Product Overview

High-Performance EVA Backing Pads

These EVA backing pads are engineered to provide a reliable, cushioned interface for abrasive discs, facilitating consistent material removal during sanding, polishing, and grinding tasks. Featuring a durable polyurethane construction and a hook-and-loop fastening system, they allow for rapid disc changes and even pressure distribution. Designed for versatility, these pads are compatible with various rotary tools and are suitable for demanding applications in automotive, woodworking, and metalworking sectors.

General Specifications

Density	MEDIUM
Material	PU (Polyurethane)
Thickness	12 mm
Fastening System	Hook and Loop
Minimum Order Quantity	300

Technical Data

Available Configurations

Item NO	Thread	Size	Max RPM
3002044	5/8"-11	8"	6650
3002032	M14	8"	6650
3002031	5/8"-11	7"	8500
