

Evacuated Tube Solar Water Heater

This high-efficiency solar water heater is designed for both residential and commercial use. It utilizes evacuated tube technology to maximize heat absorption while minimizing heat loss, providing a sustainable hot water solution.

Product Overview

Sustainable Hot Water Solution

This high-efficiency evacuated tube solar water heater is engineered for both residential and commercial applications. By utilizing advanced evacuated tube technology, the system ensures optimal heat absorption while maintaining minimal heat loss even in varying conditions. The unit features a robust, corrosion-resistant frame and a high-capacity storage tank, offering a cost-effective and sustainable solution for daily hot water requirements.

Technical Specifications

Technology	Evacuated Tube Collector
Installation	Easy installation, Low maintenance

Build Quality

Construction Details

- Corrosion-resistant frame
- High-capacity water tank
- High-efficiency thermal absorption

Application

Target Use

Residential • Commercial
