

Evacuated Tube Solar Water Heater

High-efficiency solar water heater utilizes evacuated tube technology for superior heat absorption and retention. Features a durable storage tank and robust frame for long-lasting performance.

Overview

High-Efficiency Solar Heating

This evacuated tube solar water heater is designed for superior heat absorption and retention, making it an ideal choice for both residential and commercial water heating applications. By utilizing advanced evacuated tube technology, the system maximizes solar energy capture even in low-light conditions to ensure a consistent hot water supply. Its robust construction features a durable storage tank and frame, offering a sustainable, cost-effective, and low-maintenance solution for modern energy needs.

Technical Specifications

Technology	Evacuated Tube
Suitable Applications	Residential, Commercial

Key Features

System Highlights

- High-efficiency heat absorption
- Superior heat retention
- Durable storage tank
- Robust mounting frame
- Low-light performance

Maintenance

Minimal Maintenance • Easy Installation
