

Evaporative Air Cooler and Exhaust Fan Combo

This combo unit functions as both an evaporative air cooler and an exhaust fan. It features digital controls, adjustable settings, a portable design, and a water tank for enhanced cooling.

Product Overview

Versatile Climate Control Solution

This dual-function unit seamlessly combines the capabilities of an evaporative air cooler and an exhaust fan, making it a versatile addition to any indoor environment. Designed with a sleek, modern aesthetic in black and silver, it fits perfectly into contemporary interiors while providing efficient cooling and air circulation. The inclusion of a water tank for evaporative cooling ensures enhanced comfort, while the portable design with caster wheels offers maximum flexibility for placement.
