

Evaporative Air Cooler for Commercial Spaces

This evaporative air cooler is designed for industrial and commercial environments. It provides efficient cooling through water evaporation, making it a cost-effective alternative to traditional air conditioning systems.

Overview

Efficient Cooling for Large Spaces

The KF60 series evaporative air cooler is engineered for demanding industrial and commercial environments, including factories, schools, and supermarkets. By utilizing the natural principle of water evaporation, this unit offers a highly energy-efficient and cost-effective alternative to traditional air conditioning for large open spaces. Its robust construction ensures long-lasting performance, while mobile caster wheels and adjustable fan speeds provide flexible, localized cooling exactly where it is needed most.

Performance & Features

Ideal Applications

- Factories
- Schools
- Supermarkets
- Large open commercial spaces

Cooling Technology

Evaporative Cooling

Key Features

High-capacity water tank, Adjustable fan speeds, Mobile caster wheels, Adjustable louvers, Robust construction

Design & Mobility

Mobility

Yes

Mobility Mechanism

Mounted on caster wheels
