

Evaporative Air Cooler with 20L Tank

This evaporative air cooler provides cooling through water evaporation. It features a 20L water tank, a 200W motor, an ionizer, and an LED display with remote control.

Product Overview

Efficient Evaporative Cooling

This portable evaporative air cooler is designed to provide effective cooling for personal or small-scale environments. By utilizing the natural principle of water evaporation, the unit efficiently lowers ambient air temperatures while maintaining portability. Equipped with a 20L water tank and mounted on casters, it offers a flexible and mobile solution for climate control in various workspaces.

Technical Specifications

Water Tank Capacity	20 L
Cooling Method	Evaporative

Design & Mobility

Available Colors	Multiple Colors
Mobility	Casters, Portable

Control & Operation

Control Interface	Integrated control panel for fan speed and settings
