Product Overview

Advanced Evaporative Cooling

This evaporative air cooler offers a sophisticated cooling solution for indoor environments, combining a sleek tower design with powerful performance. It features a digital LED interface that provides real-time temperature monitoring and precise control over cooling settings. With five adjustable speed levels and internal oscillation, it ensures efficient and customizable airflow distribution for any room.

Performance & Control

Fan Speed Levels	5 levels
Oscillation	Yes

Interface & Display

Control Features

- 5-Speed Adjustment
- Timer Function
- Oscillation Control
- Humidity/Mode Control
- Power On/Off

Control Type	Touch Screen
Display	LED Display, Digital Temperature Readout
