

Evaporative Air Cooler with Glass Top

This evaporative air cooler provides rapid cooling with its high-quality ball bearing motor and three efficient cooling pads. It features a modern design with a glass top cover and offers three wind speeds and modes, along with a dust filter and two ice crystal boxes.

Overview

High-Efficiency Evaporative Cooling

The HS-788A evaporative air cooler offers a powerful and stylish solution for maintaining a comfortable climate in spaces ranging from 25 to 40 square meters. Featuring a modern design with a glass top, this unit combines an impressive 6800m³/h air flow with a large 45L water tank for extended cooling performance. It is an ideal choice for residential or light commercial environments seeking efficient, energy-conscious air circulation.
