

Evaporative Air Cooler with Ionizer

This air cooler uses a paper cooling pad for efficient evaporation. It features an ionizer to purify the air and can be operated via remote control.

Product Overview

Efficient Cooling and Air Purification

The TJ-XK08A evaporative air cooler is designed to provide effective cooling while simultaneously improving indoor air quality. Equipped with a built-in ionizer, this unit actively cleans the air as it cools, making it an ideal choice for maintaining comfortable and healthy environments. It features convenient remote control operation and efficient power consumption, ensuring ease of use for professional and commercial spaces.

Technical Specifications

Model Number	TJ-XK08A
Power Consumption	80 W
Key Features	Ionizer, Remote Control, Evaporative Cooling
