

Evaporative Air Cooler with Multi-Layer Cooling Pad

This evaporative air cooler utilizes a multi-layered cooling pad system for enhanced cooling. Its portable design includes caster wheels for easy movement and a user-friendly control panel.

Overview

High-Efficiency Evaporative Cooling

This evaporative air cooler is engineered for effective cooling in both residential and commercial environments. Featuring a robust 70L water tank and a multi-layered cooling pad system, it ensures sustained performance and enhanced cooling efficiency. Designed with portability and user convenience in mind, the unit includes adjustable louvers and intuitive controls to provide customized airflow solutions.

Technical Specifications

Water Tank Capacity	70 L
Cooling Technology	Evaporative Cooling, Multi-Layer Pad

Features

Control & Operation

- Adjustable louvers
- Multiple fan speed settings
- Water level indicator
- User-friendly control panel

Design & Portability

Portable • Caster Wheels

Application Suitability	Residential, Commercial
