

Evaporative Air Cooler with Remote Control

This evaporative air cooler delivers efficient cooling through water evaporation. It is equipped with a multi-speed fan, adjustable louvers for directional airflow, a remote control, a refillable water tank, and caster wheels for easy movement.

Overview

Efficient Cooling Solution

This evaporative air cooler offers a highly efficient and energy-saving alternative to traditional air conditioning systems. Designed for indoor environments, it utilizes advanced water evaporation technology to provide refreshing airflow. With user-friendly features like remote control operation and adjustable louvers, it ensures customizable comfort for any space.

Usage Environment	Indoor Use, Residential, Commercial
-------------------	-------------------------------------

Cooling Performance

Cooling Method	Water evaporation
Fan Operation	Multi-speed fan
Airflow Control	Adjustable louvers for directional airflow

Features & Convenience

Portability

- Compact design
- Integrated caster wheels

Remote Control Included	Yes
Water Management	Refillable water tank for extended operation

Efficiency

Efficiency Status

Energy Efficient • AC Alternative
