Product Overview

Natural Cooling & Air Purification

This evaporative air cooler provides a natural, energy-efficient cooling solution without the need for a compressor. Beyond cooling, it enhances indoor air quality through integrated UV-C sterilization to eliminate germs and bacteria, alongside an anion generator to purify the air. Designed for convenience, the unit is portable, lightweight, and features a detachable water tank for easy maintenance.

Performance & Features

Included Accessories

- 2 Ice Packs
- Remote Control

Water Tank Capacity	5 L
Timer Duration	15 H
Key Features	UV-C Sterilization, Anion Generator, Remote Control, Low Water Alarm, Portable Wheels

Design & Usability

Maintenance

Detachable Tank • Easy Filling • Easy Cleaning

Portability	Yes
