

# Evaporative Cooling Fan with Misting Feature

This evaporative cooling fan uses a multi-blade design and misting technology to provide efficient cooling. It has electronic controls for adjusting fan speed, misting intensity and oscillation and is mounted on caster wheels for easy movement.

## ADDITIONAL IMAGES

## Overview

### Advanced Cooling Solution

This 12-inch ultrasonic mist cooling box fan combines powerful air circulation with advanced misting technology to effectively lower ambient temperatures. Designed for versatility, it features multiple speed and wind modes, alongside a negative ion generator for air purification. With added conveniences like a 9-hour timer, remote control, and mosquito repellent function, it provides a comprehensive climate control solution for indoor spaces.

## Performance & Technical

### Evaporation Capacity

**200 ml/h**

Evaporation Rate

**1.3 L**

Water Tank Capacity

### Power Consumption

100 W

### Motor Specifications

74\*74\*14mm, all-copper construction with overheat protection

## Design & Features

### Special Functions

Negative Ion Purification • Mosquito Repellent • Infrared Remote Control • 9h Timer

### Fan Size

12 inch

### Wind Modes

Normal, Natural, Sleeping

### Oscillation

Directional or 360°

### Display

LED light display
