Product Overview

Industrial Evaporative Misting Fan

This high-performance evaporative misting fan is designed for efficient cooling in large spaces, including manufacturing facilities, warehouses, and outdoor areas. Utilizing a centrifugal misting system, it eliminates the need for nozzles and filters, ensuring low maintenance and reliable operation. Built with a durable, epoxy resin-coated surface and a high-efficiency motor with thermal protection, this unit offers stable performance, long service life, and robust overload capacity for demanding professional environments.

Technical Specifications

Oscillation Angle	90 degrees
Speed Settings	3
Motor Construction	Low temperature-rise design, Cold-rolled silicon steel, Pure copper winding, Thermal protector

Safety & Durability

Safety Protections

- Waterproof electric design
- Water pump dry-run protection
- Resettable thermal motor protector
- Anti-rust epoxy resin coating

Applications

Ideal Use Cases

Factories • Warehouses • Greenhouses • Athletic Fields • Garages • Patios
