

Evaporative Portable Air Cooler with 10L Tank

This air cooler uses evaporative technology to provide localized cooling. Its tower design includes caster wheels for portability, a 10L water tank, and a front grille for directing airflow.

Product Overview

Efficient Evaporative Cooling

This evaporative portable air cooler offers a versatile cooling solution for home and office environments. Featuring a compact tower design with integrated caster wheels, it is easy to move and position for localized comfort. The unit combines advanced filtration and purification technology with user-friendly controls to maintain a pleasant indoor climate.

Technical Specifications

Water Tank Capacity	10 L
