

Evaporative Tower Air Cooler with 3L Tank

This air cooler uses evaporative technology to provide efficient cooling. It features a vertical tower design with a 3L water tank and electronic control panel.

Product Overview

Efficient Evaporative Cooling

This evaporative tower air cooler combines a sleek, fashionable design with efficient cooling performance. Featuring a 3L water tank and a vertical tower form factor, it is optimized for indoor use with a compact footprint. The unit includes advanced control features like a VFD display, remote operation, and a programmable timer, making it a versatile climate control solution for various professional environments.
