

Excavator and Loader Bucket Teeth

Bucket teeth are essential components for excavators and loaders, designed for digging and material handling. These durable teeth enhance the performance and efficiency of earthmoving equipment.

Product Overview

Heavy-Duty Earthmoving Components

These bucket teeth and adapters are engineered for high-performance digging and material handling applications. Designed to maintain the efficiency of excavators and loaders, these components provide essential ground-engaging capabilities. The range covers a wide selection of models, ensuring compatibility with various heavy machinery used in construction and earthmoving projects.

Compatibility

Supported Excavator Models

- PC400
- PC200
- PC220
- CAT320B
- CAT320
- Komatsu PC200
- HD800
- KATO
- WY60
- WY80
- WY20
- WY20A

Supported Loader & Dozer Models

- D85-18
- D155
- T355
- ZC30
- CAT938
- ZL40
- ZL50

Technical Details

Available Component Types

Bucket Teeth, Adapters, Side Cutters, Ripper Tips, Vertical Pin Teeth, Horizontal Pin Teeth
