Product Overview

Heavy-Duty Excavator Bucket

This high-strength excavator bucket is engineered for demanding digging, trenching, and material handling tasks. Built from durable, wear-resistant steel, it features reinforced cutting edges and optimized geometry to maximize fill capacity and digging force. Designed to perform in abrasive conditions, this attachment is suitable for a wide range of construction, demolition, and mining applications.

Technical Specifications

Construction Material	High-strength steel
Key Features	Reinforced cutting edge, Wear-resistant, Optimized tooth placement, Reinforced wear plates

Applications

Primary Applications

- Digging and trenching
- Material handling
- Construction and demolition
- Mining operations
- Landscaping
