

Excavator Bucket Blade and Lip Assembly

This excavator bucket blade and lip assembly is designed for optimal digging and loading performance. The assembly features durable metal construction with a yellow coating.

Product Overview

High-Performance Bucket Assembly

This excavator bucket blade and lip assembly is engineered for heavy-duty digging and loading operations. Constructed from high-durability metal with a protective yellow finish, the assembly features a robust U-shaped support structure and precision-engineered side plates. It is designed to optimize site productivity and maintain structural integrity under demanding excavation conditions.

Compatibility & Applications

Available Related Components

- Bucket teeth and tips
- Tooth adapters and holders
- Tooth lock pins
- Lip and heel shrouds
- Wear caps
- Kwiklok liners
- Ripper tooth shanks
- Side cutters and wing shrouds

Compatible Equipment Types

Excavators, Loaders, Bulldozers, Motor Graders, Electric Shovels

Technical Specifications

Assembly Components

- Central U-shaped support structure
- Triangular side mounting plates
- Outer side plates
- Straight blade with square cutouts
- Toothed lip assembly
