Product Overview

High-Performance Bucket Cutting Edge

This heavy-duty cutting edge is engineered for construction machinery, providing exceptional durability and wear resistance in demanding excavation and material handling applications. Manufactured from high-grade steel, it ensures a reliable fit with pre-drilled holes for efficient installation on excavators, bulldozers, or motor graders. Its robust design is optimized to withstand harsh working conditions, ultimately extending the service life of your equipment in mining and earthmoving operations.

Material & Compatibility

Material Specifications	16Mn, 30MnB
Compatible Machinery	Excavator, Bulldozer, Motorgrader

Technical Dimensions

Standard Configurations

Dimension (mm)	Hole Pattern
3041.7 x 304.8 x 40	30 x 135
3036 x 300 x 40	30 x 135
3200 x 304.8 x 40	30 x 135

Reference ID

9V6575
