

# Excavator Bucket for PC200 Series

This excavator bucket is designed for PC200 series excavators. Its high-strength steel build ensures durability, while reinforced cutting edges and optimized tooth geometry provide efficient digging and loading.

## Product Overview

### Heavy-Duty Excavator Bucket

This heavy-duty bucket is engineered specifically for the PC200 series of excavators. Constructed from high-strength steel, it is built for durability and extended wear life in demanding environments. The design features reinforced cutting edges and optimized tooth geometry to ensure efficient digging and material handling performance.

## Technical Specifications

### Bucket Volume

**0.8 m3**

Capacity

### Compatibility

Komatsu PC 200 series

## Design Features

### Construction

High-strength steel, Reinforced cutting edges

## Applications

### Primary Applications

- Trenching
- Excavation
- Material handling
