

Excavator Bucket Rock Chisel Tooth

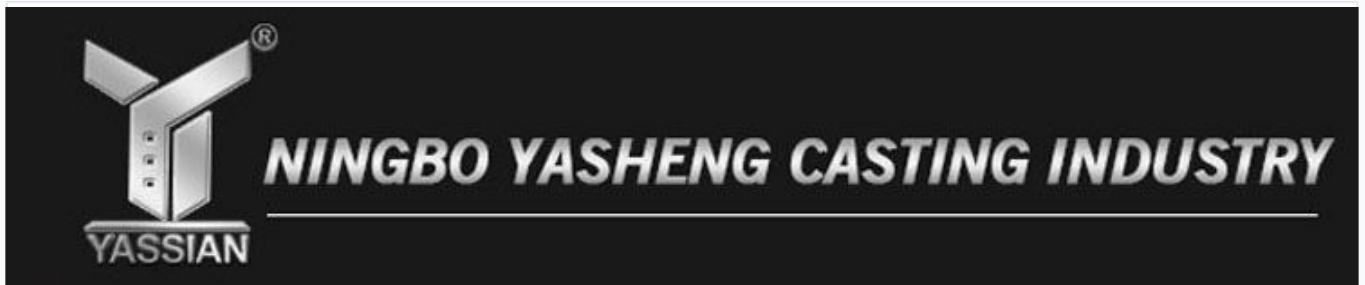

This bucket rock chisel tooth is designed for Komatsu PC200 excavators. It is made from hardened alloy steel for maximum durability and wear resistance in demanding digging and excavation applications.

ADDITIONAL IMAGES

Product Overview

Precision-cast rock chisel tooth designed for heavy-duty excavation.

High-Performance Rock Chisel Tooth

This bucket rock chisel tooth is specifically engineered for demanding excavation tasks, offering superior penetration in rocky terrain. Manufactured from high-strength alloy steel, it provides exceptional impact toughness and wear resistance for extended service life. The design ensures a precise fit for compatible heavy machinery, reducing downtime and optimizing digging efficiency in construction and mining environments.

Technical Specifications

Net Weight Options

- 4.5 KG
- 5.3 KG
- 5.7 KG

Part Number	205-70-19570RC
Material	Hardened Alloy Steel
Hardness	HRC 47-52

Compatibility

Compatible Machines

Komatsu PC200, Caterpillar, JCB, Hyundai, Doosan

Manufacturing & Quality

Production Process

- Precision Casting
- CNC Drilling for accurate hole alignment
- Automatic electrostatic spray painting

Certifications

ISO9001: 2015 • SGS

Service & Warranty

Comprehensive range of bucket wear parts available with a two-year warranty.

Warranty

24 Months

Warranty Period

Warranty Terms

Free replacement for broken parts with abnormal wear life under normal working conditions.

Logistics & Trade

Minimum Order Quantity	10 pc
Delivery Lead Time	30-35 days (30 days per 20ft container)
Packaging	Plywood case
Loading Ports	Ningbo, Shanghai, Guangzhou, Yiwu
Payment Options	Ali Trade Assurance, T/T, L/C
