

Excavator Bucket Teeth

These bucket teeth are suitable for excavators and loaders. They are manufactured from hardened alloy steel for enhanced penetration and material handling.

Product Overview

High-Performance Excavator Bucket Teeth

These excavator bucket teeth are engineered for superior digging performance and durability in demanding construction environments. Manufactured from hardened alloy steel using advanced lost wax casting techniques, they are designed to withstand significant abrasion and impact. With a robust hardness rating and precision fitment, these components ensure reliable material handling and extended service life for your machinery.

Technical Specifications

Part Number	61NA-31310
Material	Alloy steel
Process	Lost wax casting
Hardness	48-52 HRC
Impact Resistance	>= 18J

Physical Attributes

Weight	12.6 kg
Size	R360
Available Colors	Yellow, Black, Green, Gray

Compatibility & Customization

Customization

- Custom drawings
- Custom samples
- Custom material specifications
- Custom mechanical properties
- Custom color options

Quality & Standards

Standards

ISO 9001:2008
