

Excavator Bucket Teeth

These bucket teeth are designed for excavators, loaders, and bulldozers. They are made from high-strength materials for wear and impact resistance in demanding digging and excavation tasks.

Overview

High-Performance Ground Engaging Tools

These customized bucket teeth and tooth tips are engineered for heavy-duty applications across excavators, loaders, and electric shovels. Designed for maximum durability, they provide exceptional resistance to wear and impact in demanding excavation environments. Precision manufacturing ensures a secure fit and reliable operation, significantly enhancing the overall efficiency and service life of your heavy equipment.

Compatibility

Compatible Series & Models

- J450
- J550
- J600
- J700
- J460
- 20X
- 30X
- 60X
- 60T
- 25S
- 22S

Supported Machinery

Excavators, Loaders, Bulldozers, Motor Graders, Electric Shovels, Rippers

Technical Specifications

Part Number References

Reference Code	Type/Description
25-RC12	Bucket Tooth
ZD181T	Tooth Tip
SD200NR/L	Side Cutter/Tooth
3861-25RC-b	Heavy Duty Tooth
84168130	Standard Tooth
C52TL	Tiger Tooth
K240RC	Rock Chisel
DJ53TL	Tiger Tooth
168-3089	Wear Part
PJ50-000301	Specialty Tooth

Fork Teeth Sizing

- 1000.3 (17mm)
- Loader teeth (22mm)
- Bolt-on tooth (21mm)
- Fork tooth (21mm)
- Fork teeth (32mm)

Wear Components

Available Wear Accessories

Tooth Lock Pins • Wear Caps • Lip Shrouds • Heel Shrouds • Kwiklok Liners • Adapters

Design Features

Specialized Designs

- RC (Rock Chisel)
- TL (Tiger Long)
- NR/L (Right/Left Side)
- TT (Twin Tiger)
- HD (Heavy Duty)
