High-Performance Excavator Bucket Teeth

These casting bucket teeth are engineered for high-performance excavation and material handling in demanding construction environments. Designed for optimal penetration and exceptional wear resistance, they ensure extended service life and reduced operational downtime. The robust construction and precise fitment make them a reliable choice for various earthmoving and digging tasks across multiple machinery platforms.

Technical Specifications

Manufacturing Process	Casting
Material Features	Hardened Materials, Wear Resistant, High Durability

Compatibility

Compatible Machinery Brands

- Caterpillar
- Komatsu
- Doosan
- Hyundai
- JCB
- Volvo

Reference Part Numbers

1U3352RC • 299886

Experience

Manufacturing Since

2003

Established

Application

Suitable Machinery

Excavators, Loaders
