

Excavator Bucket Teeth for Dirt, Rock, and Penetration

These excavator bucket teeth are engineered for high wear resistance and increased production efficiency. They offer high reliability and are designed to be hard, tough, and fatigue-resistant.

Product Overview

High-Performance Excavator Bucket Teeth

These bucket teeth are engineered for superior durability and performance across a wide range of ground conditions, from standard dirt to challenging rock formations. Designed for heavy-duty applications, the product line includes specialized profiles such as flare, short, rock penetration, rock chisel, and tiger teeth. Each design is optimized to ensure efficient material handling, reduced downtime, and extended service life for construction and mining equipment.

Compatibility

Compatible Equipment Types

Excavator, Loader, Electrical Shovel, Bulldozer Ripper

Product Varieties

Available Tooth Profiles

- Flare Tooth
- Short Tooth
- Dirt Tooth
- Rock Penetrator Tooth
- Rock Chisel Tooth
- Tiger Tooth
- Twin Tiger Tooth
- Abrasion Tooth
- Heavy Duty (HD) Tooth
- Ripper Tooth

Design Features

High Penetration • Heavy Duty • Abrasion Resistant • Precision Fit
