Product Overview

High-Performance Excavator Teeth

These forged excavator bucket teeth are specifically engineered for EC460TL, LG6460, and EC460RC models. Designed for heavy-duty digging and excavation, they offer superior wear resistance and durability in demanding construction environments. Their robust construction ensures extended service life, improved penetration, and reliable performance for increased productivity on the job site.

Compatibility

Compatible Models	EC460TL, LG6460, EC460RC, LG6460RC, EC480TL

Technical Specifications

Key Features

- Wear-resistant material composition
- High-impact resistance
- Enhanced penetration capability
- Precision fitment for secure installation

Performance Metrics

2005
