Product Overview

High-Performance Excavator Bucket Teeth

These precision-engineered bucket teeth are designed specifically for PC200 series excavators, offering robust solutions for demanding construction and earthmoving environments. Manufactured using advanced forging techniques, they provide superior strength, wear resistance, and a secure fit for reliable operation. Whether for RC (Rock Chisel) or TL (Tiger Long) applications, these components ensure efficient digging and long-lasting durability on the job site.

Technical Specifications

Available Tooth Profiles

RC (Rock Chisel) • TL (Tiger Long)

Reference Part Numbers

Profile Type	Part Number
RC (Rock Chisel)	205-70-19570RC
TL (Tiger Long)	205-70-19570TL

Compatible Machine Series

PC200

Manufacturing Quality

Key Performance Features

- Enhanced wear resistance
- High-strength forged construction
- Precision-engineered for secure fit
- Optimized for heavy-duty excavation

Manufacturing Method

Precision Forging
