

Excavator Bucket Teeth with Pins and Adapters

These excavator bucket teeth offer high wear resistance for increased production efficiency. Their durable construction provides high fatigue resistance and reliability.

Product Overview

High-Performance Excavator Ground Engaging Tools

These heavy-duty bucket teeth, pins, and adapters are engineered for high-impact excavation and material handling in demanding mining environments. Designed for compatibility with major electric shovel models, the system features a robust, easy-to-maintain locking mechanism for efficient tooth replacement. The components are built to withstand severe wear, ensuring consistent performance and extended service life for your bucket assembly.

Compatibility

Supported Electric Shovel Models

TZ WK20, TZ WK35, TZ WK55, P&H 2800, P&H 4100A, P&H 4100XPB, P&H 4100XPC

Component Details

Available Component Types

- Bucket Teeth (Points)
- Adapters
- Pins
- Lip Shrouds
- Heel Shrouds
- Wear Caps
- C-Clamps
- Wedges

Common Part References

Component Category	Example Part Numbers
Wear Caps	WC175, WC185
Points	75SV2RXL, 85SV2RXL
Pins	75SV2PN, 85SV2PN
Shrouds	K1601 series, K1901 series
