

Excavator Bucket Tooth

Durable and wear-resistant bucket teeth are designed for excavators and loaders. These teeth are engineered for optimal digging performance and extended service life in demanding construction and mining applications.

Product Overview

High-Performance Excavator Bucket Tooth

These durable and wear-resistant bucket teeth are engineered for excavators and loaders, providing optimal digging performance in demanding construction and mining environments. Manufactured from high-strength alloy steel, they offer superior impact and abrasion resistance to ensure a long service life. Designed to improve material penetration and reduce operational downtime, these teeth are available in various configurations to suit diverse bucket types and soil conditions.

Technical Specifications

Material	High-strength alloy steel
Compatible Applications	Excavators, Loaders, Construction, Mining
Part Reference	103362

Key Features

Performance Benefits

- Superior impact resistance
- High abrasion resistance
- Enhanced material penetration
- Extended service life
- Reduced downtime
