

Excavator Bucket Tooth 9N4352

This heavy-duty excavator bucket tooth is designed as a replacement for Caterpillar machinery. The tooth is made from high-quality materials for abrasion, impact, and corrosion resistance, ensuring extended wear life.

Product Overview

Heavy-Duty Excavator Bucket Tooth

This excavator bucket tooth is a durable and reliable replacement part engineered for extended wear life and optimal performance in demanding excavation applications. Constructed from high-quality materials, the tooth offers superior resistance to abrasion, impact, and corrosion. Its long design provides enhanced penetration and digging capabilities, making it a robust solution for heavy-duty machinery.

Technical Details

Part Number	9N4352
Design Type	HD Long
Standards Compliance	EN1995

Applications

Suitable Machinery

- Excavators
- Metal forming machines
