

Excavator Bucket Tooth Adapter

This weld-on adapter is designed for securing teeth to excavator buckets. It offers high wear resistance and ensures reliable performance with high fatigue resistance.

Product Overview

Heavy-Duty Excavator Bucket Tooth Adapters

These high-strength steel adapters are engineered for secure attachment of bucket teeth in demanding excavation and digging applications. Designed for durability and extended service life, they provide a precise fit to minimize equipment downtime and maximize operational productivity. Built to withstand significant wear and impact, these components are essential for maintaining the performance of heavy machinery buckets.

Compatibility

Compatible Machinery Types

Excavator, Loader, Bulldozer, Electrical Shovel

Product Range

Available Adapter Configurations

- Weld-on Adapters
- Bolt-on Adapters
- Flush Mount Adapters
- Corner Adapters
- Adapter Covers
