Overview

High-Performance Excavator Bucket Teeth

These replacement bucket teeth are specifically engineered for E312 excavators and similar earthmoving machinery. Manufactured using a forging process, they provide superior strength and resistance to wear and impact in demanding construction environments. The precision-crafted design ensures a secure fit and efficient penetration of soil and rock, significantly enhancing machine productivity.

Technical Specifications

Compatible Part Numbers	1U3252, 1U3252 RC, 1U3252 TL
Manufacturing Process	Forging
Material	High-strength alloy steel

Compatibility & Application

Compatible Equipment

- E312 Excavators
- Loaders
- General Earthmoving Equipment

Recommended Applications

- Soil penetration
- Rock handling
- General construction
- Material handling

Quality & Standards

Certifications

ISO 9001 • CNAS • CQC
