

Excavator Bucket Tooth for EX70 Series

Excavator bucket tooth designed for the Hitachi EX70 series. Its high-strength steel construction ensures reliable performance and extended service life.

Product Overview

High-Performance Excavator Bucket Tooth

This excavator bucket tooth is engineered for the EX70 series, utilizing high-quality alloy steel for superior durability and wear resistance. Manufactured through a precise lost-wax casting process, it achieves a hardness of 48-52 HRC to withstand demanding excavation tasks. Designed for reliable performance, this component ensures efficient digging and material penetration in various soil conditions.

Technical Specifications

Part Number	TB00394
Material	Alloy steel
Weight	2.2 kg
Process	Lost wax casting
Hardness	50 HRC
Impact Resistance	>= 18J
Available Colors	Yellow, Black, Green, Gray

Compatibility & Range

Supported Styles

- Komatsu style (PC60-PC1250, WA380, WB93)
- Hyundai style (R130-R500)
- ESCO style (18s-45s, V17TYL-V61SYL, 18TL-30TL, 25RC12, 35RC14)
- Kobelco style (SK200, SK230, SK350)
- H&L style (230SP, 23TL, 23WTL, 240S, 250S)
- Hidromek style (81010600, 81010630, 81010640)
- Bofors style (3031537, 4046819, 4047167, 4046797)
- Terex style (146220M3)
- Volvo style (1171-01620, 1171-01900, A55L50, 14553244TL)
