Product Overview

High-Performance Ground Engaging Tools

These professional-grade ground engaging tools (GET) are engineered for optimal digging performance and extended wear life in demanding construction and excavation applications. Manufactured from hardened alloy steel, they provide superior strength and resistance to abrasion, even in tough soil and rock conditions. The reinforced design ensures reliable operation, improved penetration, and reduced downtime for heavy-duty earthmoving equipment.

Product Features

Available Tooth Types

Flat teeth, Bullet teeth, Wall cutter, Casing teeth, Welding bars, Weld on teeth

Compatibility & Applications

Compatible Equipment Types

- Drilling Buckets
- Rock Augers
- Core Barrels
- Continuous Flight Augers (CFA)
- Casing Twisters
- Casing Shoes
- Pipe Shoes
- Core Rings
- Belling Tools

Supported Machinery

- Rotary drilling rigs
- Piling rigs
- Trenchers
- Cutter soil mixing machines
- Skid steer auger attachments
- Post hole diggers

Material & Quality

Quality Assurance

High-strength • Abrasion resistant • Impact resistant

Material
Hardened alloy steel
