

Excavator Bucket Tooth S290-5

This S290-5 excavator bucket tooth is designed for construction machinery. It ensures optimal digging and excavation performance with its durable construction.

Product Overview

High-Performance Excavation Tooth

The S290-5 RC tooth is a precision-engineered component designed for heavy-duty construction machinery. Built for durability in demanding excavation and material handling applications, it offers superior resistance to wear and tear. Its robust design facilitates efficient soil penetration and material displacement, significantly enhancing operational productivity and reducing equipment downtime.

Technical Specifications

Compatible Part Numbers	2713-1219 RC/TL, 2713Y1219TL
Net Weight	7.7 KG
Manufacturing Method	Precision wax-lost casting

Application Details

Primary Applications

- Earthmoving
- Excavation
- Material Handling
