

Excavator Bucket Tooth Tip

This bucket tooth tip is designed for optimal performance and durability in excavation and construction. It is engineered to withstand heavy impact and abrasion, providing a precise fit for enhanced digging efficiency.

Overview

High-Performance Excavation Components

These bucket tooth tips are engineered for demanding excavation, construction, and earthmoving applications. Designed to withstand heavy impact and high abrasion environments, they ensure extended service life and reduced operational downtime. The precise fit facilitates reliable attachment, contributing to enhanced digging efficiency and overall site productivity.

Compatibility

Available Part Series

- 1U Series
- 9W Series
- 6Y Series
- 4T Series
- 7T Series
- 8E Series
- 135/138/144 Series
- 208/331/445 Series

Compatible Equipment

Excavators, Loaders, Bulldozers, Motor Grader Rippers

Technical Details

Included Components

Bucket Tooth • Tooth Tip • Tooth Point • Tooth Pin • Retainer • Adapters

Design Variations

- Standard
- Long/Heavy Duty
- RC (Rock/Chisel)
- SYL (Tiger)
- TL (Twin Tiger)
- WTL (Wide Twin Tiger)
- Futura
