

Excavator Bucket Tooth with Pin and Adapter

Designed for earthmoving equipment, this excavator bucket tooth offers high wear resistance for increased production efficiency. It features a secure pin and adapter system, ensuring reliable attachment and performance.

Product Overview

Heavy-Duty Earthmoving Components

This range of high-performance bucket teeth, pins, and adapters is engineered for extreme durability in demanding earthmoving environments. Designed for secure attachment, the system ensures consistent performance and reduced downtime during heavy-duty operations. These components are compatible with a wide array of global heavy equipment brands, providing a reliable solution for construction and mining applications.

Compatibility

Compatible Equipment Brands

CAT, KOMATSU, HITACHI, JCB, KOBELCO, HYUNDAI, TEREX, VOLVO, LIEBHERR, BUCYRUS, P&H, DOOSAN, SANY, SDLG, XUGONG, LIUGONG

Technical Specifications

Available Component Types

- Bucket Teeth
- Pins
- Adapters
- Shrouds
- Heel Shrouds
- Side Cutters
- Wear Caps
- Ripper Teeth
- Shanks

Known Part Markings

0212 • GS3V212A-K • PAT. 4760523

Design Features

- Dirt Tooth configuration
- Twistlock pin system
- Weld-on adapter availability
- Toplok tooth design
