Overview

High-Performance Cutting Edge for Heavy Machinery

The 7T6936 cutting edge is a versatile component designed for use in excavators, motor graders, and bulldozers. Engineered for optimal performance in demanding construction environments, it provides superior cutting and wear resistance to maximize productivity. This precision-engineered part ensures a perfect fit and easy installation, significantly reducing maintenance downtime.

Technical Details

Part Number

7T6936

Material Properties

High-Strength Steel, Abrasion Resistant, Impact Resistant, Wear Resistant

Application

Compatible Machinery

- Excavators
- Motor Graders
- Bulldozers
- Earthmoving Equipment

Performance

Key Benefits

- Extended service life in heavy-duty applications
- Engineered to meet or exceed OEM specifications
- Optimized design for efficient grading and earthmoving
- Precision-engineered for easy installation

Customization

Available Options

Multiple specifications and colors available upon request
