

Excavator Digging Bucket

Excavator bucket is designed for digging and loading materials. It features robust construction, multiple teeth for efficient ground penetration, and reinforced mounting points.

Product Overview

High-Performance Excavator Bucket

This robust digging bucket is engineered for durability and efficient material handling in demanding excavation environments. Designed specifically for compatibility with the PC 120 excavator series, it ensures a secure fit and reliable performance. With a substantial 0.6m3 capacity, this attachment is built to optimize productivity for various digging and loading tasks.
