Product Overview

Professional Ditching & Grading Solution

This ditching mud bucket features a specialized wide shell and shallow profile, engineered for efficient ditch sediment removal and precision grading. Constructed from high-wear steel, the bucket offers enhanced durability on the bottom and sides for a longer operating life. It is an ideal attachment for land clearing, drainage projects, and slope work, offering a robust alternative to standard digging buckets.

Design & Construction

Construction Material	High-wear steel
Drainage Capability	Yes
Drainage Location	Both sides

Compatibility & Options

Attachment System	Standard pivot hanger system
Cutting Edge Options	Bolt-on edge optional, Teeth-free design

Applications

Primary Applications

- Ditch sediment removal
- Grading work
- Slope work
- Land clearing
- Drainage maintenance
