

Excavator Final Drive Travel Motor

This final drive travel motor is designed for excavators. It provides the necessary torque and speed to propel the excavator, ensuring smooth and efficient movement across various terrains.

Overview

High-Performance Excavator Propulsion

This TM40/GM40 series final drive assembly is a robust hydraulic travel motor designed to provide the necessary torque and speed for heavy-duty excavator movement. Engineered for durability in demanding construction environments, it ensures smooth and efficient propulsion across various terrains. This aftermarket solution offers a reliable and cost-effective alternative for maintenance and repair while meeting or exceeding operational requirements.

Technical Specifications

Primary Material
Steel

Part Name	Final Drive Travel Motor
------------------	--------------------------

Application	Excavator
--------------------	-----------

Compatibility

--

Compatible Models

XE215C, SK200-8, DH200-5, DH200-7, DH220-5, DH220-7, DH225, R215-7, R210-7, R210LC-7, R250-7, R250LC-7, R225-7, R210-9, R215-9, HD800-7, HD700-7, JCB220, LG922, LG925, SH200-1, SH200-2, EC210B

Commercial Terms

Warranty

6 Months

Warranty Coverage

Minimum Order Quantity

1 PC
