

Excavator Gasket Ring

Gasket rings are made to fit accurately in Excavator machines. They are made with PTFE materials and comply with international standards.

Product Overview

Precision-Engineered Sealing Solutions

These excavator gasket rings are designed for robust sealing applications in heavy machinery and industrial equipment. Constructed from high-quality PTFE, they provide a reliable barrier against leaks and contaminants to ensure optimal performance and component longevity. Engineered for durability, these seals offer excellent resistance to compression, wear, and chemical degradation, making them ideal for hydraulic systems, pumps, and valves.

Technical Details

Material	PTFE
Warranty	6 Months

Compatibility

Compatible Brands	Case, Sany, Komatsu, Volvo
