

# Excavator General Purpose Bucket

This general purpose bucket is designed for excavators for digging and loading applications. High strength steel increases stiffness and wear resistance ensuring a longer life.

## ADDITIONAL IMAGES

## Product Overview

### General Purpose Excavator Bucket

This general purpose bucket is designed for durability and high performance in various digging applications. Constructed with high-strength steel and a diamond-folded top beam, it ensures structural integrity and a long service life. The design includes a dual-layer side wall and a hard-wearing cutting edge to protect against abrasion and damage in demanding soil conditions.

## Performance Specifications

### Machine Tonnage Range

**0.8 Ton**

Minimum Tonnage

**48 Ton**

Maximum Tonnage

### Custom Width Range

9 to 72 inches

## Materials and Construction

### Cutting Edge Material

HARDOX 400 or equivalent (HB400)

### Key Structural Features

High strength steel base, Dual layer side wall, Diamond folded top beam, Optional back wear strips

## Compatibility and Options

### Compatible Teeth Systems

- Kmax
- Usco
- Ultra Lock
