Product Overview

High-Performance Ground Engaging Tools

These heavy-duty ground engaging tools (GET) include specialized V29 series teeth and adapters designed for demanding construction and excavation environments. The assembly features a V29SYL GP tooth for versatile soil digging and a V29RC tooth optimized for rock and abrasive conditions. Manufactured for durability, these components ensure stable performance and extended wear life in professional machinery applications.

Technical Specifications

Included Components

- V29SYL GP Tooth
- V29RC Tooth
- V29-40 Adapter

Application Profiles

Component	Application Type
V29SYL GP Tooth	General Purpose Digging
V29RC Tooth	Rock & Abrasive Conditions

Adapter Compatibility

40 mm
