

Excavator Hydraulic Cylinder Seal Kit

This O-ring kit provides accurate dimensions for use in excavator machines. These NBR material O-rings are compliant with international standards.

Product Overview

High-Performance Hydraulic Sealing Solution

This premium hydraulic cylinder seal kit is engineered to provide exceptional performance under high-pressure and dynamic conditions. The kit features a multi-component design, including blue polyurethane, dark gray PTFE, and composite metal-reinforced rings, ensuring a robust barrier against leakage. Designed as a high-quality alternative to genuine parts, these seals offer reliable durability for heavy-duty construction machinery applications.

Technical Details

Materials	NBR, Polyurethane, PTFE, Composite Metal
Warranty Period	6 months

Compliance

Product Type
OEM Standard

Compatibility

Supported Machine Types

- Excavators
- Hydraulic Cylinders
- Fluid Power Systems
