Product Overview

Versatile Hydraulic Grapple

This hydraulic grapple is engineered for heavy-duty material handling, capable of managing wood, rocks, and demolition debris with ease. It features wear-resistant strips and hardened self-lubricating bushings to ensure long-term durability and simplified maintenance. Designed for compatibility with excavators, backhoes, and telescopic loaders, this attachment offers precise hydraulic control to maximize efficiency across various site conditions.

Key Features

Maintenance Features

- Wear strips around inner dump
- Hardened self-lubricating bushings
- Easy-access lubrication points

Machine Compatibility

Excavator, Backhoe, Telescopic Loader
