

# Excavator Hydraulic Grapple Attachment

Hydraulic grapple attachment designed for excavators in mining and construction. It features robust construction and hydraulic cylinders for precise control during sorting, loading, and demolition tasks.

## Product Overview

### High-Performance Hydraulic Grapple

This hydraulic grapple attachment is engineered for heavy-duty material handling in mining and construction environments. Featuring a robust multi-tine design and powerful hydraulic cylinders, it offers precise control for complex tasks. It is an ideal solution for efficient sorting, loading, and demolition operations.

## Technical Specifications

### Key Design Features

- Robust construction
- Hydraulic cylinders for precise control
- Multi-tine grapple design

Suitable Applications	Mining, Construction, Sorting, Loading, Demolition
Attachment Type	Hydraulic Grapple
