Product Overview

High-Performance Hydraulic Breaker

This hydraulic hammer is engineered for demanding demolition, excavation, and rock-breaking applications. Built with premium raw materials to ensure durability and minimize downtime, it delivers powerful impact energy with a variable impact rate. Designed to increase breaking frequency, it helps operators complete tasks efficiently while maintaining high productivity in challenging construction and mining environments.

Technical Specifications

Primary Applications

- Demolition
- Rock Breaking
- Excavation
- Mining

Service & Support

After-sales support • Competitive pricing

Excavator Range

0.8 – 65 tonne

Key Performance Features

Variable Impact Rate, High Impact Energy, Robust Housing, Durable Construction
